- 2 TRIM POCKETS INCLUDED
- FULLY MODULAR
- ADJUSTABLE HARNESS
- EN 1809:2014 + A1:2016

Separated harness from air bladder

OPTIONAL

- SEAC Modular Max is the evolution of Modular, SEAC's rear-volume recreational BCD designed for use with dual tanks.
- Donut bladder with 44 lbs of lift in durable 1680 Denari Ballistic Nylon outside and internal air chamber in polyurethane. Features a piston inflator and two quick discharge valves arranged to make it possible to dump quickly from any position.
- Freely customizable: every part of the SEAC Modular Max BCD is interchangeable.
- You can simply and quickly adjust the structure of the BCD and find just the right buoyancy in any situation.
- Standard connections: the backpack for the SEAC Modular Max BCD can accommodate different bladders and backpacks thanks to its standard-gauge eyelets for fastening using straps and other fasteners. The padding prevents any irritation from clamps in contact with the back.
- Convenient for travel: SEAC Modular Max is the BCD that fits conveniently in your luggage, making it ideal for dive vacations.
- It disassembles quickly, takes up little space, and weighs just 6.8 lbs, so you can use your own BCD, set to just how you need it, even when you travel.
- The standard equipment for the Modular Max includes: harness with removable shoulder straps and soft backpack with removable steel core, 44 lbs dual donut bladder, 2 pockets with quick weight release, 4 anodized aluminum D-Rings, and waist buckle in stainless steel.

EQ PRO

MADE IN ITALY

-  EXTRA LIGHT
-  IDEAL FOR DIVE TRAVELS
-  X8 8 METAL D-RINGS
-  4 POCKETS INCLUDED
-  COMFORT FIT
-  LOW-DRAG DESIGN
-  EN 1809:2014 + A1:2016

2 WEIGHT POCKETS INCLUDED

2 TRIM WEIGHT POCKETS INCLUDED

- Ultra-practical harness: quick and easy to put on. Simply fasten the flat center buckle and adjust the front straps and shoulder straps.
- "Frame to back" system: the adjustments for the shoulder straps start directly from the backpack. The BCD won't warp, so the weight stays distributed correctly.
- Independent bladder: The bladder in the SEAC EQ-PRO "slides" along the harness completely independently. When inflated, the pocket area rests comfortably along your sides, so it won't squeeze your abdominal area.
- Functional, low-drag design: even more compact bladder and a contour designed to be more hydrodynamic. Handle inside the backpack, making it easy to transport.
- Excellent fit for men and women: 3D Mesh inserts wrap fully around the shoulder straps and prevent rubbing.
- Swivel buckles adapt the harness to the female body. Available in 5 sizes.
- Dry weight (size L): 7.7 lbs (including hose).
- Rear weight pockets standard (Trim Pocket).
